### Description

The ProSafe CargoStopp is used in conjunction with the SoboGrip ProSafe floor for form-fitting load securing. It is inserted into the ProSafe floor lashing points and includes an integrated lashing point. The lashing belt can therefore be directly hooked into the CargoStopp, saving you an additional floor lashing point. The CargoStopp ProSafe has a locking function in addition, which prevents the CargoStopp from unintentionally slipping out of the floor lashing point. The ProSafe CargoStopp therefore provides for quick and professional load securing. The ProSafe CargoStopp can be screwed to the aluminium locking beam (ref. no. 1000020089) to have a continuous stop bar on the floor.
