ProSafe lashing belt 0.77 m

Material no.: 1000000228 | Matchcode: PSH PGA | EAN code: 4045294195953

Description

The ProSafe lashing belt with a length of 0.77 m is specially designed for the securing of propane gas bottles with a diameter of 270 mm and is also for the Sortimo TopSystem ProSafe version. Belt is hooked-in to the individual lashing point or into the ProSafe lashing rails. Can still be deployed universally in the vehicle. The ratchet enables a higher clamping force to be achieved as would be possible with the clamp buckle. This means you can secure heavy objects professionally. The anti-slip mat which can be cut to size (Ref. No.: 6000003365) additionally prevents the shifting of payloads. When it comes to payloads with sharp edges, an edge protection profile should be used to protect the lashing belt and the load. Note: The authorities require vehicle ventilation with free openings when transporting gas bottles. For this purpose we provide a ventilation system in our original accessories programme, which can be used for both ventilation and extraction purposes.

We reserve the right to make changes in the interest of technical progress, as well as correcting printing errors and mistakes. Pictures are similar, decorative material not included. With the publication of this data sheet, previous editions lose their validity. Version: 29.02.2024
