Description

The tool belt enables tools and work materials to be kept directly on the body. The integrated padding and sturdy design mean that you can carry tools on your hip comfortably and without straining your back. The ProClick Holders can be attached flexibly to the belt strap, allowing you to quickly swap tool bags by simply clicking and releasing. Thanks to its tidy arrangement and quick accessibility, the belt is also easy to use when working overhead on a ladder or scaffolding. There is no need to continuously climb up and down, enhancing safety and also saving considerable time.

The tool belt has space for attaching up to five ProClick Holders or ProClick Tool bags.

The XL belt has a length of 160 cm and can be continuously adjusted between 120 and 155 cm. Its sturdy quick-release clasp is easy to fit and remove with one hand. Integral D-rings also permit the optional attachment of a shoulder strap.

ProClick Holders are not included in the scope of delivery. If required, you can order them separately with article no. 6000013927.
