Description

The tool tray is a carrier system for ProClick bags and accessories, as well as the C-BOXX and the SR5 van racking. This is achieved, on the one hand, by the six integrated interfaces on the ends, and, on the other hand, via three strip loops on the front, onto which the ProClick Holder can be fixed. It has a large stowage facility for tools and consumables, which is accessible and easily viewed from above. Bags and loops inside and outside contribute to an improved overview and order. The zipped pocket on the front of the tray also provides a location for your hacksaw, and your spirit level is stored on the top using Velcro strips. The sturdy plastic base protects not only the tray and its contents from impacts and dirt, but also allows it to click onto any L-BOXX using the integrated connecting clamp. This allows you to transport the tool tray, together with L-BOXXes, from your vehicle to the site in a single trip. It goes without saying that the tray integrates seamlessly in every van racking from Sortimo. This coupling also permits the optional tool trough to be incorporated, thus offering additional stowage space under the tool tray. The padded metal carrying handle and shoulder strap also make it comfortable to carry, even with the maximum load of 24 kg.
