Description

The C-BOXX is a robust transport solution for almost all trade, industry and service activities. Thanks to its bucket-like design, the C-BOXX offers a large storage volume of 17 L and can be used anywhere to transport and store tools, consumables and even dirty used parts. The transparent lid seals the C-BOXX dust-tight and protects the contents. The folding handle makes the C-BOXX easy to carry. The handle can be folded down again to save space. The size of the C-BOXX is optimally designed for shelves and shelf trays of the Sortimo van racking. But it can also be used outside the van racking in many areas. The slots along the top edge allow the adaptation of ProClick tool bags. They permit tools to be quickly transported from the vehicle on site, and include the required consumables in the C-BOXX.
