Description

The SR-BOXX 05-10 M is the ideal storage option for small parts of all kinds. The functionality of the SR-BOXXes is unique in van racking systems. The option of integrating them both on top of and underneath shelves in the vehicle interior means that the available space is used to its full potential. The pull-out function allows convenient access to the contents at all times. Lift slightly to completely remove the BOXX from the van racking system.

The transparent lid closes the SR-BOXX 05-10 M dust-tight, and protects the contents from dirt. The transparent design provides for a constant overview of the contents. On the one hand this minimises the time you spend searching for materials and consumables, at the same time ensuring that you can determine the stock levels of your small components at a glance. You can see at an early stage when you need to re-order, thus avoiding costly downtimes. The flap lid allows prompt access in the SR5 vehicle interior without having to remove the entire SR-BOXX. To access the full contents, e.g. for refilling, the lid can be completely opened.

For ideal workplace organisation, the SR-BOXXes can be labelled with mySortimo labels. Combined with the Sortimo colour code, time spent searching for components is minimised and refilling is easier. An SR label clip is required if labels are used.

The interior space of the SR-BOXX 05-10 M can be partitioned across the depth using up to four dividers 00-10 M.

We reserve the right to make changes in the interest of technical progress, as well as correcting printing errors and mistakes. Pictures are similar, decorative material not included. With the publication of this data sheet, previous editions lose their validity. Version: 13.08.2025
